Subject: RE: REPLY REQUESTED: Status of CZARA 6217 New Development Documents: Revised Draft TMDL Implementation Guidelines and Draft Strategy for Updating Existing TMDL Implementation Plans to Incorporate New Guidance.

Hi Jayne

Don is out on leave until the first week of April.

We are continuing to work on the Guidance document for urban DMAs in the CNPCP. Benjamin Benninghoff (MS4 Stormwater Permit Coordinator) has been helping us with the document. We have a revision, but it probably needs some finalizing before releasing for the next review. I think it is in much better shape than the previous draft and as soon as I finish my review of the edits it should be ready for your review.

As far as our strategy for updating existing TDML IPs in the CNPCP, we do not have a proposal drafted, but I would think as we develop IR-TMDLs in the CNPCP we will be getting revised TMDL IPs from the urban DMAs or have the requirements in the TMDL/WQMP.

cheers
Gene

Hi Don and Gene,

As you know, our meeting with the upper management from DEQ and EPA R10 is scheduled for Monday March 5. Will you have the following documents done in time for EPA and NOAA to review them prior to that meeting or the March 1 planning meeting focused on Forestry and New Development?

Revised draft TMDL Implementation Guidelines f(or the Coastal Nonpoint Program management area that incorporate the new development

management measure requirements or practices).

Draft strategy for updating existing TMDL Implementation Plans to incorporate new guidance.

Your responses to the questions above will help me plan both meetings' agendas and for others to plan their workloads.

Gratefully,

Jayne Carlin, Oregon CZARA 6217 Coordinator
